## Supportive Community Health Services

United Way of South Wood & Adams Counties

**GOAL: IMPROVING QUALITY OF LIFE FOR A SPECIFIC POPULATION WITH AN IDENTIFIED NEED.**

35% of Wood County and 44% of Adams County households are struggling – despite most of these households earning income above the Federal Poverty Level. Working, yet unable to afford all essentials or save for emergencies, we term these households **ALICE: Asset Limited, Income Constrained, Employed.**

54% of Wood County senior households and 47% of Adams County senior households struggle financially with income below the ALICE Threshold.

United Way's investment in partner programs helps seniors access the care and support they need – meaning they can retain a high quality of life while living independently as long as possible.

**1,411**

Seniors in south Wood & Adams Counties received support services through partner programs to improve their quality of life in 2023.

Access to basic care can be a challenge for individuals with limited health care coverage, like many ALICE households.

United Way's investment helps sustain programs who meet health needs of underserved populations – meaning improved access to care and increased quality of life.

**665**

Individuals received dental treatment through a partner program in 2023.

**\$148,850** invested in partner programs in 2024.

In 2023, south Wood and Adams County residents saved **\$66,454** on prescription costs using SingleCare.

**11,000+** Help Guides were distributed in south Wood and Adams Counties in 2024.

**4,260** Individuals received access to programs and services to improve physical fitness and well being in 2023.

**450+** volunteers made an impact through Day of Caring and the Supportive Community Health Services Roundtable in 2023.
