

HEALTH

Supportive Community Health Services

GOAL: IMPROVING QUALITY OF LIFE FOR A SPECIFIC POPULATION WITH AN IDENTIFIED NEED.

SUCCESS STORY: We had the pleasure of treating a young lady over the past several months who left with not only a brighter smile but had left a lasting impression on the whole staff here at The Riverview Community Dental. This young lady came to us in July of 2022 with a mouth full of troubles. Not once did she ever complain but rather was always uplifting to everyone around her. This patient has a severe case of MS (multiple sclerosis). Although you could see she was in pain and has a difficult time navigating she never made it about her. She was always so thankful to us at each visit and grateful. There are about a total of 8 appointments, over 6 months, involved in the denture process alone. Every week she would show up smiling and be excited in looking forward to her new teeth.
